

GEAR[®]

MULTI-PURPOSE RAKE

- High Tensile Crossbars Through all Tynes
- Push/ Leveling Blade at Rear of Rake
- Secondary Ripping Teeth/ Load Stabilizers
- Replaceable Teeth Chisel/ Tiger
- Optional Additional Bar for Grade Control

SUITS EXCAVATORS
1.5T - 36T

The Multi-Purpose Rake is engineered for versatility and built to handle a wide range of operations, including:

- Ripping
- Digging
- Back/ Push Blading
- Sorting/ Sieving
- Loading out
- Carrying Trees and Culverts
- Demolition
- Ploughing
- Raking
- Airating
- Selective removal
- Stump Removal
- Tree Felling
- Levelling-out

The rake's strength comes from extensive design and field testing, high-tensile materials, and advanced structural support. Two large-diameter cross bars run through all tynes, paired with a rear push/levelling blade, delivering exceptional strength and durability for demanding earth-moving applications.

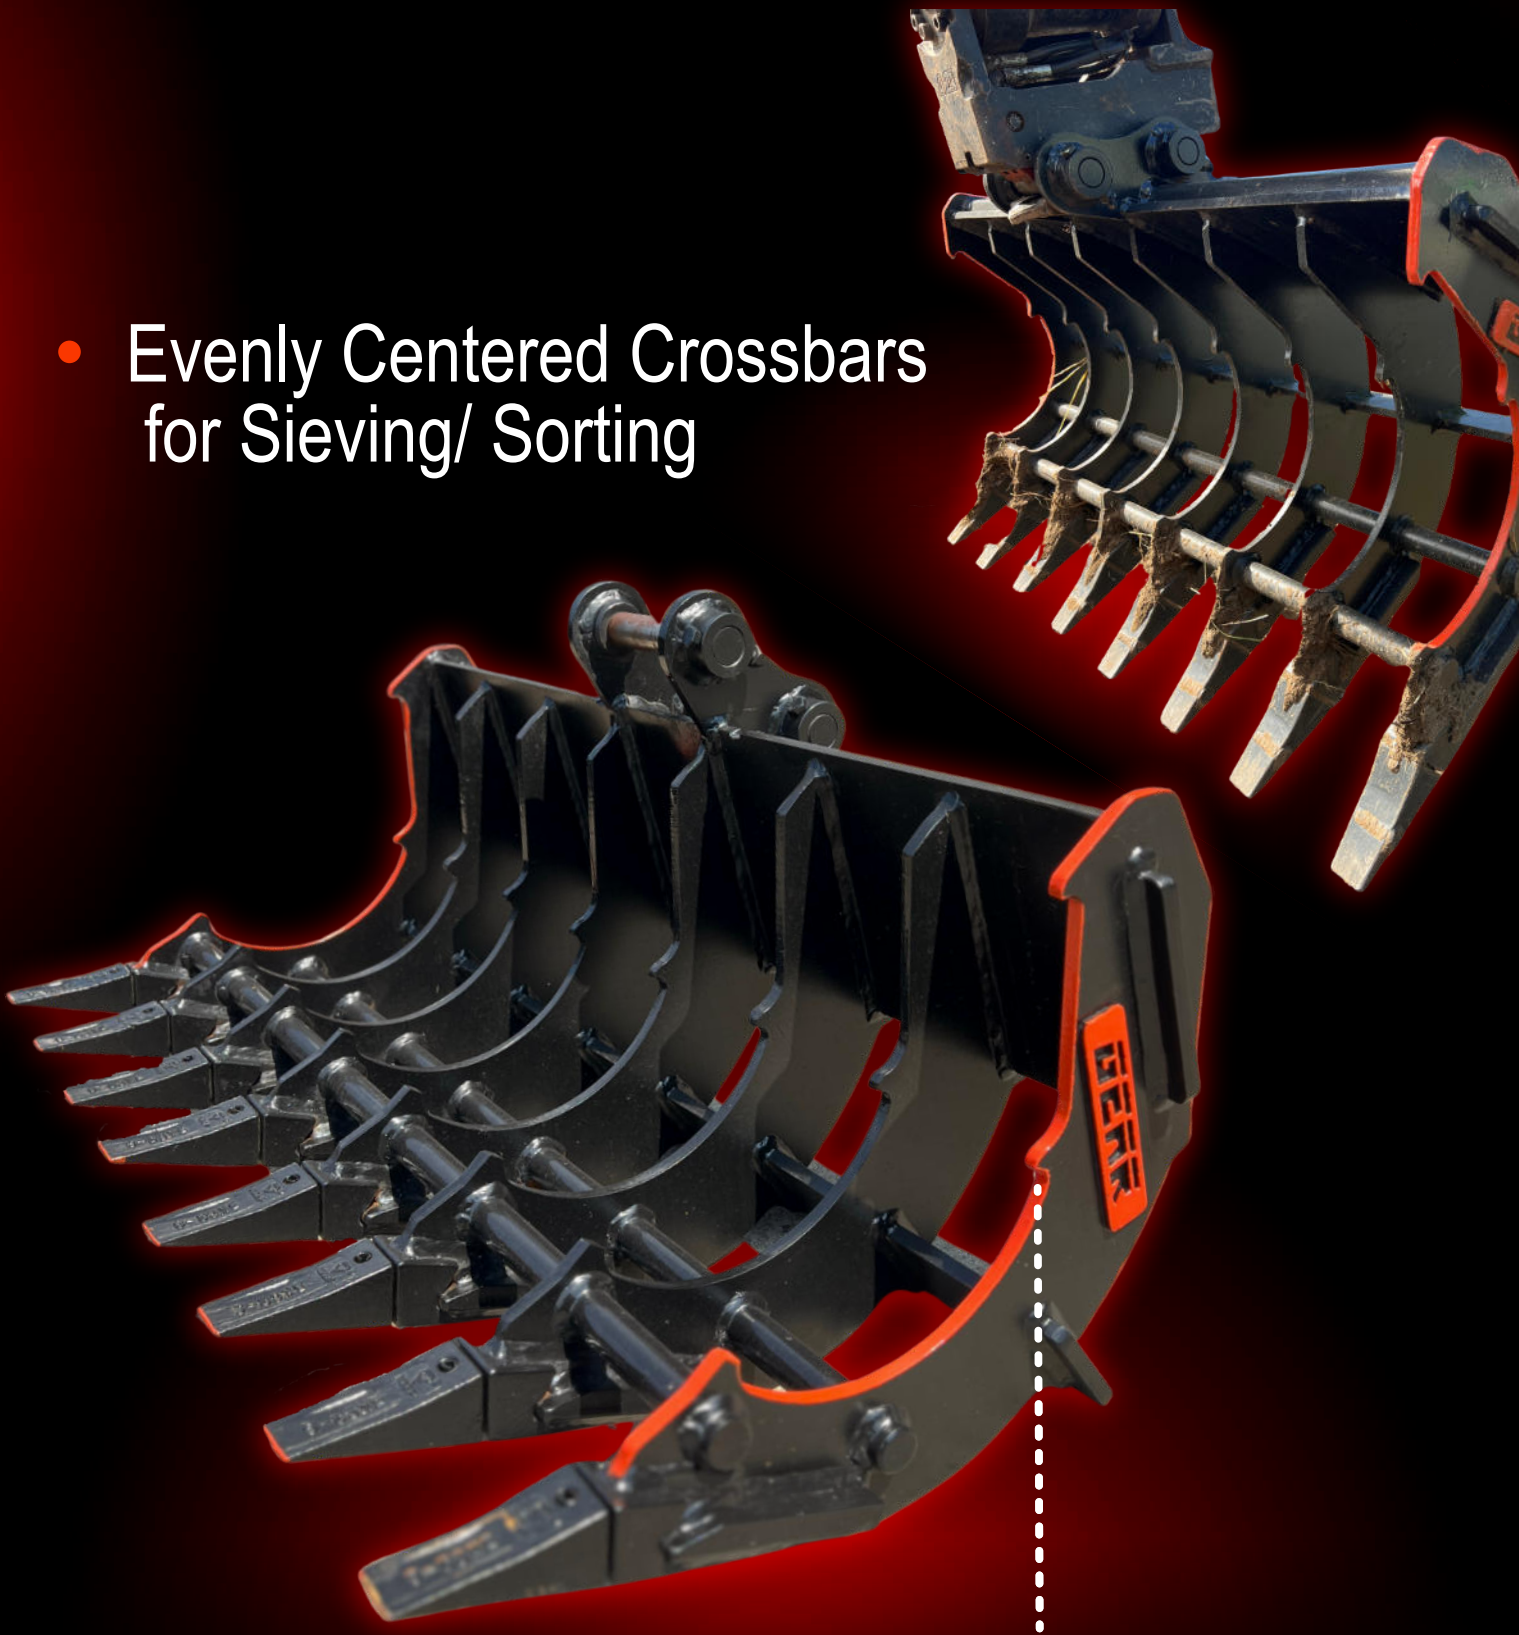

Push/ Levelling Blade
at Rear of Rake

Our Multi Purpose Rake is equipped with replaceable teeth on all tynes, making it a durable and easily maintainable attachment that outlasts any other rake on the market.

Suits Excavators
